

Good day

Are you passionate about AI or Blue-Tech and ready to tackle global challenges with innovative solutions? The French Embassy to South Africa, in partnership with Universities South Africa (USAf) and the EDHE Programme, invites you to compete in the AI and Blue-Tech Entrepreneurship Challenge! This is your chance to showcase your creativity, represent your university, and kick-start your entrepreneurial journey.

This competition highlights the importance of fostering innovation and entrepreneurship among South Africa's brightest minds, preparing the next generation to lead in technology and sustainability. Let's shape the future together!

Candidates must be registered and enrolled in one of the 26 universities in South Africa. Proof of student registration (at time of submission) must be provided. This includes Masters/ Post-doctoral academics/students.

Categories

1. AI Solutions: Projects harnessing artificial intelligence to solve real-world problems in sectors like healthcare, education, or sustainability.
2. Blue-Tech Innovations: Ocean-tech solutions promoting marine sustainability, blue economy growth, or ocean conservation.
